Recruitment

Internship in Consulting Apps, based in Madrid

Oracle Consulting Services (OCS) has an extremely high profile with customers. We understand and analyze their IT problems and opportunities, then provide the best Oracle technology solutions.

Applications consultants act as trusted advisors for customers, and do whatever it takes to deliver solutions that meet their business and value objectives.

As a consulting business, customer relationships are the heart of growing our business. We are ambassadors at the customer site both to create the right relationship and trust from the customers and to deliver high quality projects, services and advices. Our skills and capabilities are Oracle Consulting's most important asset.

We are looking to add an intern to our highly experienced Applications team in Madrid. This intern will work on projects implementing the range of Oracle Applications solutions in the Spanish market.

What you will do:

- Gathering customer requirements
- Understanding customer needs
- Working in Project Documentation
- Adapting product pages
- Supporting Senior consultants in the entire consulting process

What we offer:

- Long-term (12 Months) Part- time (09:00 – 14:00) internship
- Challenging, dynamic and fun working environment
- To start as soon as possible

What we are looking for:

- Ideally a Degree in Economics and computer science, Business and Computer engineering, Finance or other comparable qualification
- Capacity to address/Analyze administrative procedures/process/tools
