

Job Title: Future Talent Programme - Automation Functional Engineer

**Would you like to start your career in good company?
We are looking for talented and highly motivated newly graduates to join our talent program!**

Future Talent Program – **Leadership** track is a **two-year trainee program** for talents, starting in September 2019. You will get a unique chance to explore and develop your potential and your talents. You will have the opportunity to contribute and influence Tetra Pak development in a long perspective and be a part of an innovative technical environment.

From day one you will deliver results as a true team member and hold a **permanent position**. Your manager will plan the content of your programme and support you in your development journey. You will work in various parts of Tetra Pak and experience a network of colleagues all over the world.

In the era of digitalization, Tetra Pak is highly engaged in new opportunities related to Internet of Things, Automation and Information Services and the talents to be recruited within this programme will play an active and crucial role in this transformation, in collaboration with our external partners.

As **Automation Functional Engineer** you will:

- Be part of the Global Functional Leadership & Support team that consists of engineers from several places in Europe. One goal is to achieve a uniform way of working with our branded software Tetra Pak PlantMaster and standardize tools and work processes (Automation, IT, MES and Electrical). Another is to secure resources with right competence from System Integrators;
- Participate to the development of technology applications, products and solutions embedded in Tetra Pak equipment and packaging line;
- Create, develop, coordinate competence development within Automation Infrastructure, IT, MES, Electrical Engineering and Automation Project Leadership;
- Work with our specialists to improve quality and efficiency as well as acquire reusability through the whole cluster.

We are looking for newly graduates in the following areas:

- **Computer/Software/Electrical Engineering**
- Knowledge in the development of digital technology (IoT, DevOps, Deep/Machine learning, Mobile Application Design) will be considered a plus.

Qualifications

To apply to the Future Talent Program you have finished or are about to finish your Master Degree studies within Engineering. You have a mature and professional personality with the ability to create and utilize a broad network. You are a problem solver with a strong personal drive. It is important that you are result oriented with a genuine technical interest and an analytical ability. You are passionate about applying your theoretical knowledge into actual challenges. Furthermore, we believe that you are a true team player with good communication skills.

Experience from studies or work abroad is considered a merit.

You are fluent in English both written and verbal.

You like travelling up to 50% of your time.

This position will be splitted between Spain and Sweden. Besides that, it will be very important to visit, work and create a network in whole ECA (European Cluster) as well.

**Eager to get to know us yet? We are very interested in getting to know you!
Please submit your application in English online no later than February 25th.**
