

## Automotive Engineer – France

Do you want to work in an **international** environment and boost your career in a **challenging** environment? Then The AKKAdemy is made for you! We aim to bring together **high-potential engineers** from all over Europe and give them the tools to become the **next generation of top engineering consultants**.

### *What key benefits can you expect?*

- A **permanent contract** from day one.
- A **career path inside AKKA Technologies** with highly diversified sectors.
- The opportunity to deal with leaders from the **world's biggest brands**.
- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more)

### *Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

### *Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. B1 French.

### *Main responsibilities – Embedded Systems Software Engineer*

- Analyze the specifications
- Define the components to integrate
- Design the HW system architecture
- Develop the plan of validation
- Interact with the different departments (quality, mechanical design, production...)

### *Technical skills & competencies*

- Cadence OrCAD (or other PCB designer) and PSPICE (simulation)
- Knowledge of general electronic components (microcontrollers, MOSFET...)
- Communication protocols (CAN, LIN, Ethernet, Bluetooth, AUTOSAR...)

### *The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.

### *One word about AKKA Technologies*

With more than 21,000 skilled engineers and a solid presence in Europe, Asia and America, AKKA Technologies is one of the leaders among European consulting engineering companies, accelerating innovation for the largest industrial groups.

**Do you want to make bold innovation happen? Then apply now and join the AKKcelerators!**

Apply by sending your CV at: [tulasee.anishetty@akka.eu](mailto:tulasee.anishetty@akka.eu)

## Telecommunications Engineer – France

Do you want to work in an **international** environment and boost your career in a **challenging** environment? Then The AKKAdemy is made for you! We aim to bring together **high-potential engineers** from all over Europe and give them the tools to become the **next generation of top engineering consultants**.

### *What key benefits can you expect?*

- A **permanent contract** from day one.
- A **career path inside AKKA Technologies** with highly diversified sectors.
- The opportunity to deal with leaders from the **world's biggest brands**.
- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more)

### *Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

### *Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. B1 French.

### *IP Engineering*

- **Main responsibilities:** Designing, development testing, documentation, and deployment support of IP network engineering solutions, as well as upgrade and modification of IP network to satisfy services growth and expansion.
- **Key skills and competencies:** routing, switching, troubleshooting, and certifications like CCNA, CCNP, CCIE, JNCIA, JNCIP.

### *RF Engineering*

- **Main responsibilities:** Designing, implementing, and maintaining wireless communication systems.
- **Key skills and competencies:** Radio Access Mobile, VOLTE, Ultran, Atoll, OFS, OMC.

### *Fiber-Optic Network Design (FTTx)*

- **Main responsibilities:** conceptualizing and planning the creation of the fiber-optic network architecture (GPON) from the hub to the clients' premises, through key design steps (APS, APD, DOE).
- **Key skills and competencies:** SIG (ArcGIS, QGIS, MapINFO), Comac, CapFT.

### *The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.

### *One word about AKKA Technologies*

With more than 21,000 skilled engineers and a solid presence in Europe, Asia and America, AKKA Technologies is one of the leaders among European consulting engineering companies, accelerating innovation for the largest industrial groups.

**Do you want to make bold innovation happen? Then apply now and join the AKKcelerators!**

## Test Engineer – Germany

Do you want to work in an **international** environment and boost your career in a **challenging** environment? Then The AKKAdemy is made for you! We aim to bring together **high-potential engineers** from all over Europe and give them the tools to become the **next generation of top engineering consultants**.

### *What key benefits can you expect?*

- A **permanent contract** from day one.
- A **career path inside AKKA Technologies** with highly diversified sectors.
- The opportunity to deal with leaders from the **world's biggest brands**.
- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more)

### *Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

### *Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. B1 German.

### *Main responsibilities*

- Plan, control and test the system integration in the aerospace industry.
- Provide high quality documentation of the system and ensure the whole system development process.

### *Technical skills & competencies*

- Good knowledge of Python and Java.
- Good knowledge in Requirements-Based Engineering (RBE)
- Experience with DOORS
- Functional safety skills are an advantage

### *The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.

### *One word about AKKA Technologies*

- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more)

### *Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

### *Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. B1 French.
- Good knowledge of Python, C, Bash.
- Experience with Linux Kali, Metasploit, Wireshark, Nmap, Nessus, Burpsuit or Powershell scripting.

### *Main responsibilities*

- Support cybersecurity activities related to the different industries we collaborate with.
- Support the risk assessment process in collaboration with the risk analyst.
- Identify threats and vulnerabilities.
- Define the main malfunctions.
- Working in projects about Ethical Hacking, Pentesting, Cryptography and similar.

### *The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.

## Data Scientist – Germany

Do you want to work in an **international** environment and boost your career in a **challenging** environment? Then The AKKAdemy is made for you! We aim to bring together **high-potential engineers** from all over Europe and give them the tools to become the **next generation of top engineering consultants**.

*What key benefits can you expect?*

- A **permanent contract** from day one.
- A **career path inside AKKA Technologies** with highly diversified sectors.
- The opportunity to deal with leaders from the **world's biggest brands**.
- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more).

*Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

*Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. B1 German.
- Advanced knowledge of Python or R, especially in their data-science-stacks (pandas, scikit-learn, tidyverse).
- You should have strong analytical as well as conceptual skills, especially when dealing with data.

*Main Responsibilities*

- Planning, conception and realization of analytic projects and solutions.
- Analysis of complex Data from the customer with modern technologies like machine learning, artificial intelligence, Natural language processing or Computer Vision.
- Display, Representation and Interpretation of the analytical results with visualization tools.
- Development of algorithms for data evaluation through statistics, pattern recognition and machine learning.

*The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.

*One word about AKKA Technologies*

## *Embedded Software Engineer – Belgium*

Do you want to work in an **international** environment and boost your career in a **challenging** environment? Then The AKKAdemy is made for you! We aim to bring together **high-potential engineers** from all over Europe and give them the tools to become the **next generation of top engineering consultants**.

### *What key benefits can you expect?*

- A **permanent contract** from day one.
- A **career path inside AKKA Technologies** with highly diversified sectors.
- The opportunity to deal with leaders from the **world's biggest brands**.
- Unlimited Access to Online training (Udemy for Business, Rosetta Stone online language courses).
- A **competitive salary and compensation package** (International Health Insurance and much more).

### *Roadmap of this program*

- One-month **learning experience** in Geneva (Switzerland).
- Full-time **working experience** in France, Belgium, Netherlands or Germany.
- Graduation and next step in the Group.

### *Must-Have*

- **EU citizenship**.
- Bachelor or master's degree in engineering or IT related topics.
- **Proficient in English**. French and/or German are a big plus.

### *Main responsibilities*

- Development (design & designer tests) of railways ASw (Application Software).
- Software Developer for ERTMS project on EVC ASw (European Vital Computer, Train born part of ERTMS)
- Development (design & designer tests) of railways ASw (Application Software).

### *Technical Skills & Competencies*

- Ada 95 programming language (or Delphi or C if no knowledge of Ada).
- Functional Sw specification (Teamwork tool).
- Configuration and Modification management (Clearcase and ClearQuest tools).

### *The spirit and mission of The AKKAdemy*

As part of a digital transformation strategy, AKKA Technologies created The AKKAdemy and its International Graduate Engineering Program. Our program addresses those who have a genuine **passion for technologies** and provides young talents the opportunity to build a successful career and acquire a lifelong set of **consulting skills**.
